Admixture Certification of Compliance

Re: Accelguard NCA

To Whom It May Concern:

The Euclid Chemical Company hereby certifies that its liquid admixture, Accelguard NCA, is an accelerating, water-reducing admixture for concrete and meets or exceeds the requirement of ASSTM C-494, Types C and E, as well as AASHTO M-194. Furthermore, it is also certified that Accelguard NCA does not contain calcium chloride or added chloride ions other than those present in water.

Sincerely,

Jesse Osborne
Admixture Product Manager
